

OEM / ODM Capability Brief

Chengdu Jishiwei Automotive Technology Co., Ltd.

Review candidate | 14 October 2026 | Scope based on existing public records

Engineering and manufacturing scope

Hydraulic brake caliper design and production; brake hose production. Related components may involve engineering, integration or qualified supply partners, according to the project.

JSW is the engineering and manufacturing platform supporting RF RACER, the market-facing brand for branded brake products and vehicle applications.

A practical starting point for OEM / ODM cooperation

Share the application, interface requirements, target market, estimated volume, validation expectations and timing. JSW reviews feasibility, responsibilities and next steps. Sampling, quality planning and delivery arrangements are agreed for the project.

01 Project brief	Application, market and estimated quantities
02 Engineering review	Dimensions, interfaces and intended requirements
03 Scope and verification	Responsibilities and required validation evidence
04 Production coordination	Sampling, quality planning and agreed delivery

Quality-management evidence

ISO 9001:2015 certificate 44726000413R100 covers hydraulic brake caliper design and production, and brake hose production. Validity: 10 September 2026 - 9 September 2029. The record concerns the stated quality-management scope; product and vehicle testing are reviewed separately.
